## Developing Your **Greatest Asset** Cost Effectively

**Career Evolution** is the world's first fully automated coaching and development program. It delivers 80% of the benefit of an executive coach, at 10% of the cost, and for unlimited numbers of people.

Traditional coaching or training can be expensive.

Career Evolution is a cost-effective way to deploy skills development and attributes, or competencies training, throughout your organisation.

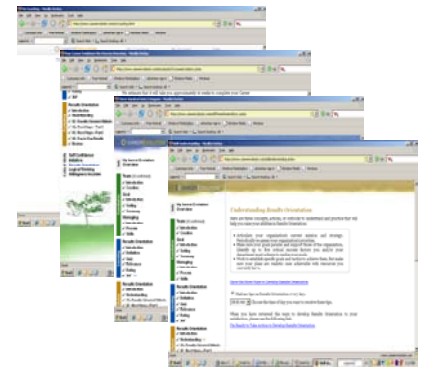

The old way of doing this, with the cost of professional trainers, travel and time lost to the company, is considerable. This is why almost every organisation struggles with the cost of deploying training widely.

Enlightened organisations realise that talent exists everywhere in the organisation, not just at the highest levels.

We have the most advanced and complete, interactive tool, on-line 24X7X365, which you control and the employee becomes engaged with. Our patent pending approach combines the power of the Internet with the best personal development technology available today.

By automating the best practices of top coaches, we can offer highly effective personal development programs, tied to your organisation's unique requirements.

Now you can do more, to help more people, be all they can be.
